

Daniela Scarcella

Curriculum breve

I started my career in Bracco SpA where I worked in Pharmaceutical Development from 1984 to 1993. After that, still in Bracco, I moved to the International Regulatory Affairs Department and had my first experience in Project Management. I left Bracco in 1997. I liked very much that Regulatory Affairs was at “the heart” of the Company and the interaction with so many other functions within the Company and outside. Moreover, I enjoyed the International role which I pursued throughout my career in various Companies.

I spent two years in small generic Companies, one year in Temas Srl, a CRO specialized in regulatory affairs and educational services but what I consider the key experiences of my working life are Janssen Cilag (now Janssen) in Italy (1998-2001) and Johnson & Johnson in the UK (European Headquarter of Janssen Cilag) in 2001-2006. In that organization I expanded my regulatory experience, national and international and I learnt the technical and soft skills that allowed me to progress further.

I completed my career as Head of Global Regulatory Affairs in Zambon SpA which I left in 2016.

After that, in 2018 I completed a one year course to become Coach and I now operate as a volunteer in different environments.
